Subject: Fw: EXTERNAL: Dimock - Request to Expedite the Project Level Review of the Round 2 Data (4 locations / metals only)

I need some clarification concerning this email. Round 2 has been submitted but the Round 1 data is still being processed and will not be done by Tuesday. Is [Ex. 4 - CBI] email specific to the Round 2 data?

Kelley,

If I have all final data by early afternoon on Tuesday I can generate tox reports by COB Tuesday.

[Ex. 4 - CBI] Thanks!!! That's great news.

Just to clarify - the priority is the data for the four homes that were re-sampled (Round 2). We also sampled three new locations for all parameters with the exception of Isotech. These were included under the Supplemental Round 1 SAP. Some of the Supplemental R1 results have been posted. Additional results are expected to be posted next week.

Please let me know if you need any additional info to complete your review. Thanks again - Kelley

I plan to work on the data tomorrow. I will make sure you have the verification/completeness checks Monday by noon.

[redacted] Ex. 4 - CBI

Have I mentioned recently what a GREAT job you are all doing?

OK... with that said... we would very much appreciate it if you would expedite your review of the Region 3 metals data for the "Round 2" homes (HW-4, 6, 7 and 8a).

I believe that [redacted] Ex. 4 - CBI said that she had entered the data into SCRIBE earlier today? I did not check - but assume that all the metals results for Round 2 are in the work order listed below which were posted yesterday to the FTP site by Cindy Caporale.

R3 (WO 1205012 Posted June 6) (Round 2 results)

1205012 FINAL R33992 06 06 12 1230.pdf

1205012 FINAL DAS R33992.txt

I am not sure what your schedules look like for the next few days, but in order to meet deadlines being set by our management, we are hoping to have the project review completed and the final qualifiers entered into SCRIBE no later than COB on Tues June 12th. Also need individual "tox reports" (on June 12th) for each of the four locations.

In order to meet this tight schedule, I think we will need to have your verification/completeness checks by COB Mon June 11th. The R3 lab would then need to review and provide a response no later than Tues early afternoon - so that the final qualifiers can be entered into SCRIBE and a tox report can be generated by COB. I realize that this is a really quick turn-around. However, (assuming you are available) given that we are talking about a limited number of samples for metals only, I think it is doable.

Please let me know ASAP whether you will be able to meet the above schedule.

Thanks again - Kelley
